

Zebedee

paper / string puppet

- YOU WILL NEED:**
- **String or yarn** - adjust the lengths as needed (head string and tail string will both be about 12 inches, wings about 24 inches)
 - **Thick cardboard or wooden stick** for controller (about 12 inches long)
 - **Hole punch and glue** (or tape, if desired)

By pulling up on the string attached to the wings you can make the pterodactyl fly!
